

## CWD Initial / Physical Animal Inventory Verification

Inventory Type: <input type="checkbox"/> Initial <input type="checkbox"/> Physical (every three years) <input type="checkbox"/> Compliance
--

Premises Name	Owner / Manager Name	Region	County / FIPS
---------------	----------------------	--------	---------------

TAHC Number (PIN or LID, if assigned)	CWD Herd Number	Year	TPWD Facility ID
---------------------------------------	-----------------	------	------------------

Owner Name	Owner Phone	Owner Address	Owner Email Address
------------	-------------	---------------	---------------------

Manager Name	Manager Phone	Manager Address	Manager Email Address
--------------	---------------	-----------------	-----------------------

Change of Address/Phone Number
--------------------------------

Species	Date of Previous Inventory	Anniversary Date	Inventory Verification Date
---------	----------------------------	------------------	-----------------------------

### Inventory (12 months or older)

Number Total Inventory	Number Incoming Transfers	Number Outgoing Transfers
------------------------	---------------------------	---------------------------

### Eligible Mortalities (12 months or older)

Number "Not Detected" Test Results	Number Inconclusive Test Results	Number Not Tested	Total Number of Mortalities
------------------------------------	----------------------------------	-------------------	-----------------------------

**Certification:** I have visually inspected this herd and certify that the herd complies with TAHC CWD Herd Certification Program standards as follows:

#### All Inventories:

Yes	No	
		This annual inspection of a cervid breeding facility was conducted by a TAHC representative or a TAHC Authorized Veterinarian 11 to 13 months after the last inspection.
		The herd was visually observed for clinical signs of CWD.
		Records were reviewed for completeness and accuracy.
		The previous year's inventory was reconciled as well as all documented dispositions and acquisitions.
		The herd owner's records were reviewed and reconciled with the overall head count; any discrepancies were documented and reported to the TAHC.
		The CWD sampling requirements were verified to have been met; any deficient, missed or poor-quality samples were documented and reported to the TAHC.
		Perimeter fencing was inspected for minimum standards and needed repairs and was documented and reported to the TAHC.

#### Initial Inventory only:

Yes	No	
		Two unique animal identification numbers for each individual animal (one official ID, one unique to the herd) were verified and recorded. At least one of the two identification devices was visually verified and reconciled with the herd owner's records.
		The herd inventory was performed not more than 60 days prior to the herd's date of enrollment.

#### Physical Inventory only:

Yes	No	
		One identification must be visually verified on 100% of the animals.

Signature of Authorized and Accredited Veterinarian/TAHC or USDA Employee	Veterinarian Accreditation Number	Date
