

# Ranchers: Watch for ticks!

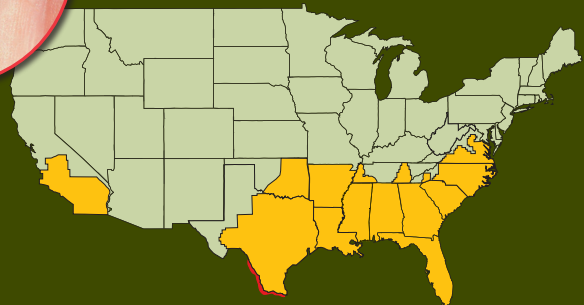

**This tick carries diseases that could wreck U.S. beef producers.**

If you see a tick that looks like this on livestock: Collect the tick, put it in alcohol, and call the Texas Animal Health Commission, the Texas A&M AgriLife Extension Service, or a large-animal veterinarian.

- Where the tick is now
- Where it could return

*No danger to humans, but these ticks can threaten wildlife and livestock.*
