

MODIFIED EXECUTIVE DIRECTOR ORDER DECLARING ANIMAL MOVEMENT RESTRICTIONS DUE TO NEW WORLD SCREWORM IN BREWSTER COUNTY

On July 9, 2026, NWS was detected in a bovine in Brewster County and Infested Zone 13 was established in the *Executive Director Order Declaring Animal Movement Restrictions Due to New World Screwworm in Brewster County* which imposed animal movement restrictions.

On July 13, 2026, NWS was detected in a bovine in Brewster County.

Based on the additional detection in Brewster County, the Executive Director modifies the July 9, 2026 order and replaces it with this order.

Due to the new detections of NWS in Brewster County, the following areas of Brewster County are designated as Infested Zone 13.A:

The Executive Director continues to find that NWS poses a serious threat to livestock, exotic livestock, fowl, and exotic fowl in Texas and further finds that moving infested animals can spread NWS flies and larvae, cause new infestations, and may increase the overall NWS population. Stopping the movement of infested animals and ensuring animals are moved safely is essential to limit the spread of NWS and reduce its impact in Texas.

To protect the health of animals in this state, reduce the spread of NWS to non-infested animals, and prevent NWS from establishing in new areas, a quarantine is imposed on the Infested Zone 13.A. Infested Zone 13.A is subject to the following animal movement restrictions:

Warm-blooded animals located within Infested Zone 13.A may not be moved outside of the zone without prior authorization from the Commission. Any person in possession or control of such animals must obtain permission and comply with all conditions set by the Commission before transporting the animals beyond the quarantine boundaries.

To move warm-blooded animals outside of Infested Zone 13.A, the animal must be inspected and treated as required by the Commission and issued a permit or certificate for movement by a Commission representative.

Hides, carcasses, and parts of any animal capable of serving as a host for NWS must be inspected and undergo any treatment deemed necessary by a Commission representative prior to removal from the Infested Zone 13.A.

Unauthorized movement is prohibited and subject to administrative penalties and/or criminal prosecution.

This order is issued pursuant to Texas Agriculture Code, Chapters 161 – 168, and applicable regulations found in Title 4 of the Texas Administrative Code, Part 2, Chapters 31 – 60 and is effective immediately.

TEXAS ANIMAL HEALTH COMMISSION
Serving Texas Animal Agriculture Since 1893

This order will remain in effect until the quarantine is released by the Commission.

Signed July 14, 2026.

A handwritten signature in black ink that reads 'Lewis R. Dinges DVM'.
